Getting Started

People say that Michigan is shaped like something. Trace around this map and draw that shape. Now do the same thing for France. What shape does it look like to you?

(NOTE: France is about the size of Texas in real life. ☺)

La Francophonie

- France includes more than just *l'hexagone*.
- Go to: <http://fr.weather.yahoo.com/Europe/france>
- Click on each of these categories that include French territories and regions.
- Give 2 or 3 examples of each category. Where are these places?
(Not sure? Check out the maps on pp. XXIII – XXV in your books.)

| | |
|---|--|
| 1. Antilles françaises | |
| 2. Départements d'outre-mer (Dom) | |
| 3. Territoires d'outre-mer (Tom) et collectivités territoriales | |
| 4. Villes | |

Instrucciones:

- Go to <http://fr.weather.yahoo.com/Europe/france/> and explore. Check out cities in a variety of countries and describe today's weather. (Short phrases and incomplete sentences are appropriate)
- You will have two sections for your notes, one for vocabulary you know from the book and another for new vocab that you figure out from Yahoo.
- **Note:** You can use the C° and F° links to get temperature information in both Celsius and Fahrenheit.

| Pays | Ville | Température Maximum | Température Minimum | Conditions – Aujourd’hui (Allez Viens) | Conditions – Aujourd’hui (Yahoo) |
|---------------|------------------------|----------------------------|----------------------------|--|---|
| France | <i>Aix-en-Provence</i> | <i>11° C 52° F</i> | <i>8° C 46° C</i> | <i>Il ne fait pas beau. Il ne fait pas chaud. Il fait frais.</i> | <i>Assez nuageux. Partly cloudy</i> |
